

IMPORTANT CHANGES TO THE CIC HANDBOOK

07/03/17 CIC Revalidation Workshops - Name Change

Technically these are not revalidations as it is the CICs responsibility to maintain a current and valid logbook and ensure they are operating at the required standard for their work. The workshops cannot contain any element of assessment due to time and ratio restraints. As from 01/04/2017 these will be renamed Update Workshops as they aim to update CICs in a range of areas through the provider and through networking with the CICs present. Any areas of concern noticed by the CIC T/A running the workshop will be noted on the S4B report with a recommended action plan to remedy, and it becomes the CIC holder's responsibility to address these.
